Architectural products proven to endure

Overly, established in 1888, offers three unique metal roofing systems that are customized for each application. The systems feature an internal drainage component which removes any moisture that migrates into the system and carefully designed joints that allow for controlled expansion and contraction in all directions.

These mechanical features allow the components to work in concert, yet independent of one another, to avoid distortion and metal fatigue. Unlike other metal roofs, Overly's profiles

can be spaced much further apart without detriment to performance and aesthetics, resulting in a customized profile that enhances the architecture.

Our greatest asset is our experience

OVERLY products are designed, engineered and fabricated using computer-aided building technology and processed by in-house engineers and skilled craftsmen. Our greatest asset is the wealth of experience our employees bring to any project we endeavor.

OVERLY is the only architectural metal cladding company in the world offering systems which truly allow design freedom for architects, based on time-proven performance principles and utilizing materials of only the highest quality.

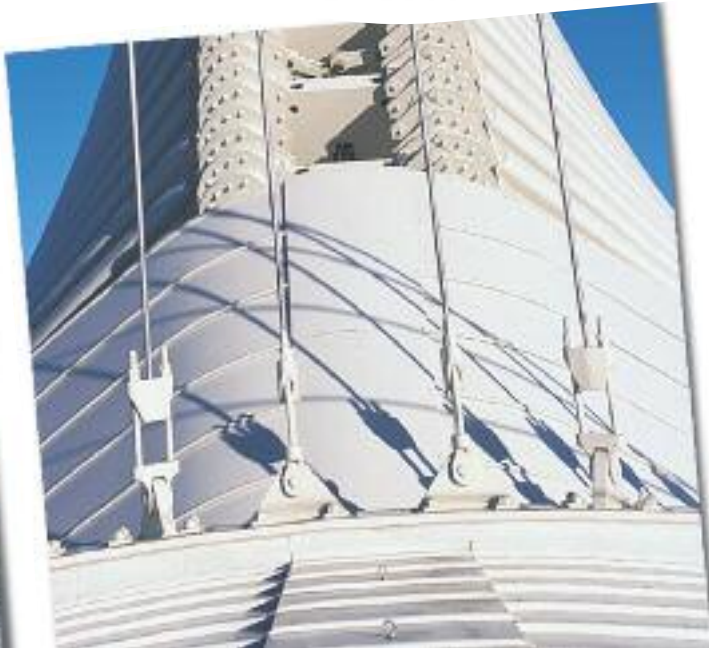

Aluminum, painted aluminum, copper, lead-coated copper, stainless steel, terne-coated stainless steel, zinc, titanium and monel are some of the materials we work with.

In pursuit of perfection

BERMUDA

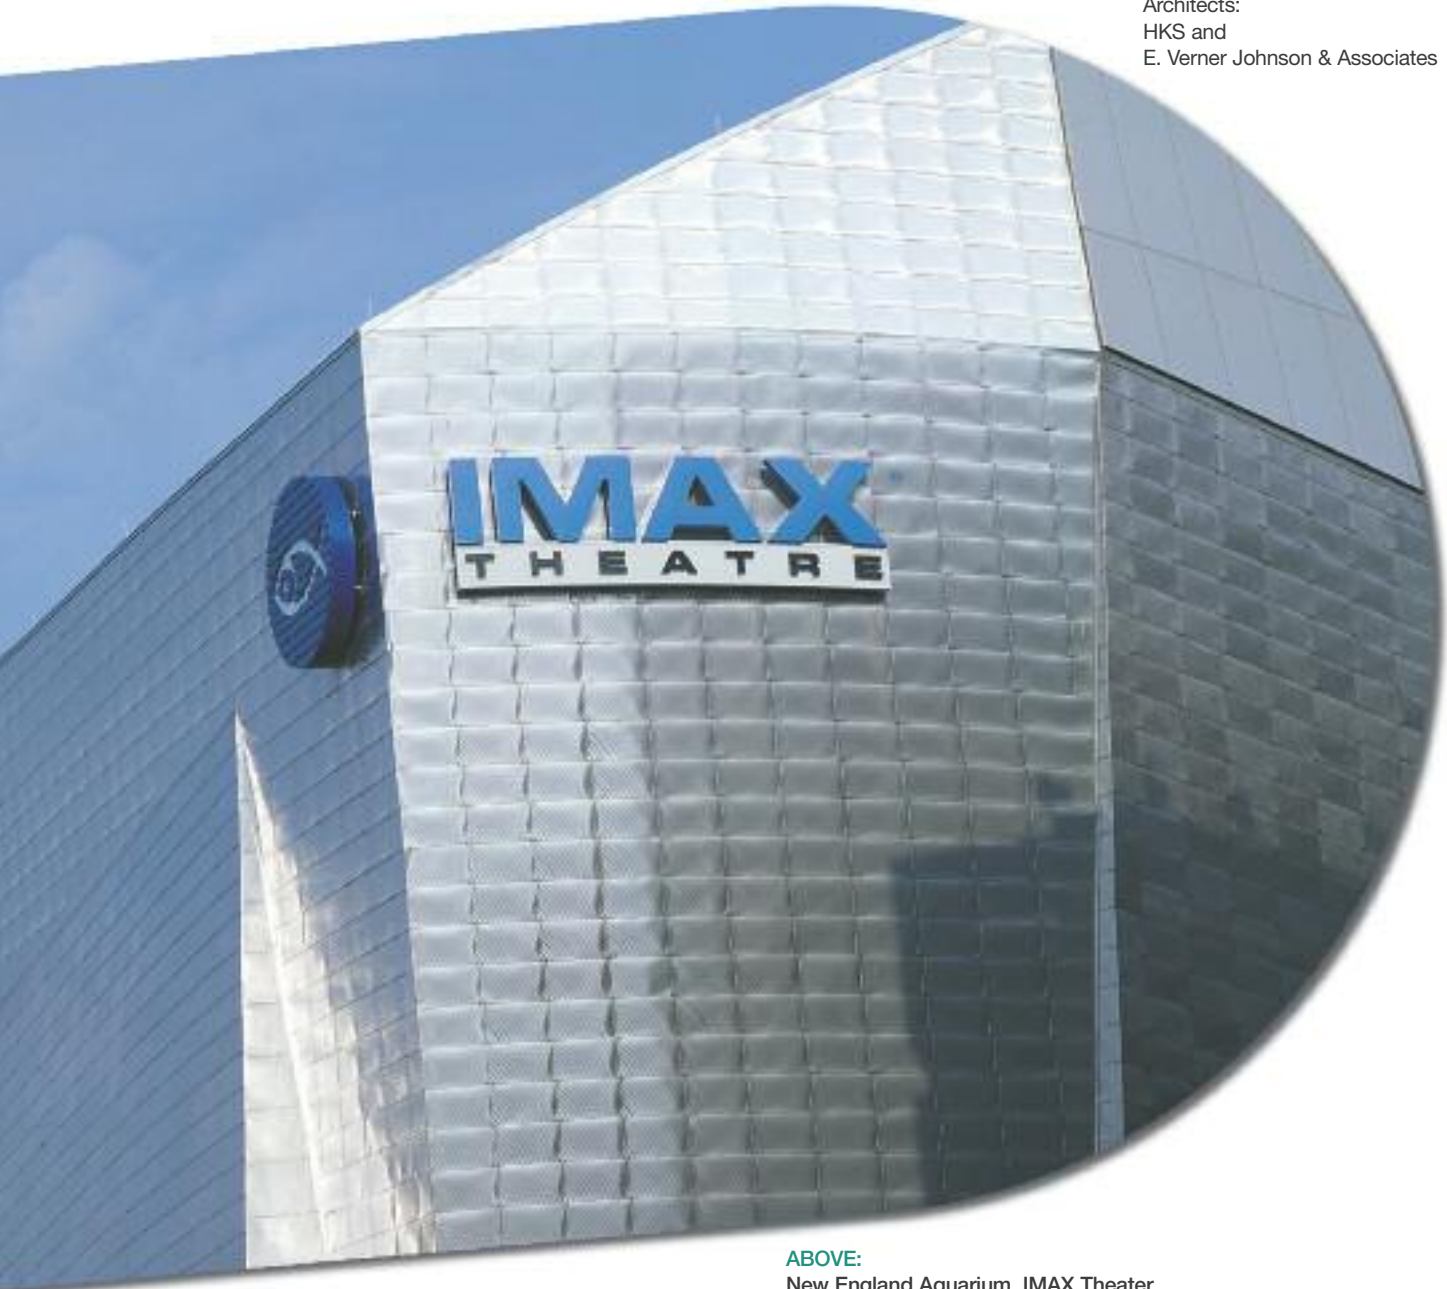

Overly emphasizes permanence, practicality, cost efficiency, teamwork and innovative problem solving to all its employees.

All interrelated project attributes and environmental factors are considered throughout the design and/or solution process. Overly provides complete design review at every stage to assure that its products exceed performance requirements.

Overly is the supplier of choice because of its experience and history. The result of our work is a superior product of value which our customers have come to rely upon implicitly.

OVERLY
MANUFACTURING COMPANY

30 year warranty

Based on the wealth of experience OVERLY has with its own custom metal roofing systems, limited warranties, for up to thirty (30) years of leakproof performance and workmanship, are available. The company must evaluate each project on an individual basis to determine the terms of the warranty to be offered.
